DEVICE TYPE & REVENUE

Our business is heavily powered by **Electronics sales** (generating 10.48M) and purchases made via **Mobile devices** (generating 12.03M). **Suggestion:** Since Mobile and Electronics drive nearly half our revenue, we should prioritize mobile-first UI upgrades and push-notification campaigns specifically for tech product launches.

Istanbul is our undisputed market leader at 5.65M in revenue, followed closely by **Ankara** (3.05M) and **Izmir** (2.65M). **Suggestion:** Allocate 70% of local marketing and inventory budgets exclusively to **Istanbul, Ankara, and Izmir** to maximize ROI, as these regions yield our highest conversion rates.

Based on the data, we have **amazing customer loyalty**, but we are relying too heavily on the same people. we need to launch a **fresh referral program** or a **first-time buyer discount** to bring in new faces.
